**WINEMAKING** "In cool years the Grenache is enormously pretty and fragrant. This was the first year of production for the Cinsault and it was thinned multiple times both for enhanced concentration and evenness of ripening. The cooler climate gives the Cinsault a wonderful articulation of flavor, but what is most noteworthy is the fact that we were able to coferment the Cinsault with Syrah. Something magical happens when Syrah and Cinsault marry; the healthy tannin titer from the Syrah seems to give more structure to the Cinsault, helps to stabilize color. The spicy, licorice component from the Syrah is a perfect foil to the Griotte cherry derived from the Cinsault."

**STORY** In 1954, the village council of Chateaufeuf-du-Pape was quite perturbed and apprehensive that flying saucers or 'flying cigars' might do damage to their vineyards, were they to land therein. So, right-thinking men all, they passed an ordinance prohibiting the landing of flying saucers or flying cigars in their vineyards. The ordinance further states that any flying saucers or flying cigars that did land were to be taken immediately to the pound.
