

GRAPE SOURCES

BONNY DOON
VINEYARD

CALIFORNIA BASED, RHÔNE VARIETAL FOCUSED

At Bonny Doon Vineyard, we source our grapes from a number of vineyards across California, but mostly from the state's Central Coast and North Coast. The state's grape growing regions are split into American Viticultural Areas (AVAs), each marking a specific region with distinctive characteristics that are passed on to the grapes that grow there. The Central Coast and North Coast AVAs have several additional AVAs nested within each of them; you'll find the majority of Bonny Doon Vineyard grapes are sourced from one of these two overarching regions. The grapes themselves are processed at our facilities in Santa Cruz, CA and in King City, CA, where our wines are subsequently produced and bottled.
